

## WASD OBSERVATION and EVALUATION DOMAINS

\*Complete rubrics found in *The Framework for Teaching Evaluation Framework*, 2011

<b>Observation and Evaluation: Four Levels of Performance</b>				
<b>Domain</b>	<b>Failing</b>	<b>Needs Improvement</b>	<b>Proficient</b>	<b>Distinguished</b>
<b>I. Planning &amp; Preparation 20%</b>	Teacher's plans reflect little understanding of the content, the students, and available resources. Instructional outcomes are either lacking or inappropriate; assessment methodologies are inadequate.	Teacher's plans reflect moderate understanding of the content, the students, and available resources. Some instructional outcomes are suitable to the students as a group, and the approaches to assessment are partially aligned with the goals.	Teacher's plans reflect solid understanding of the content, the students, and available resources. Instructional outcomes represent important learning suitable to most students. Most elements of the instructional design, including the assessments, are aligned to the goals	Teacher's plans, based on extensive content knowledge and understanding of students, are designed to engage students in significant learning. All aspects of the teacher's plans— instructional outcomes, learning activities, materials, resources, and assessments—are in complete alignment and are adapted as needed for individual students.
<b>II. Classroom Environment 30%</b>	Classroom environment is characterized by chaos and conflict, with low expectations for learning, no clear standards of student conduct, poor use of physical space, and negative interactions between individuals	Classroom environment functions somewhat effectively, with modest expectations for student learning and conduct, and classroom routines and use of space that partially support student learning. Students and the teacher rarely treat one another with disrespect.	Classroom environment functions smoothly, with little or no loss of instructional time. Expectations for student learning are high, and interactions among individuals are respectful. Standards for student conduct are clear, and the physical environment supports learning.	Students themselves make a substantive contribution to the smooth functioning of the classroom, with highly positive personal interactions high expectations and student pride in work, seamless routines, clear standards of conduct, and a physical environment conducive to high-level learning.
<b>III. Instruction 30%</b>	Instruction is characterized by poor communication, low-level questions, little student engagement or participation in discussion, little or no use of assessment in learning, and rigid adherence to an instructional plan despite evidence that it should be revised or modified.	Only some students are engaged in learning because of only partially clear communication, uneven use of discussion strategies, and only some suitable instructional activities and materials. The teacher displays some use of assessment in instruction and is moderately flexible in adjusting the instructional plan and in response to students' interests and their success in learning.	All students are engaged in learning as a result of clear communication and successful use of questioning and discussion techniques. Activities and assignments are of high quality, and teacher and students make productive use of assessment. The teacher demonstrates flexibility in contributing to the success of the lesson and of each student	All students are highly engaged in learning and make material contributions to the success of the class through their participation in discussions, active involvement in learning activities, and use of assessment information in their learning. The teacher persists in the search for approaches to meet the needs of every student.
<b>IV. Professional Responsibilities 20%</b>	The teacher demonstrates low ethical standards and levels of professionalism, with poor recordkeeping systems and skill in reflection, little or no communication with families or colleagues, and avoidance of school and LEA responsibilities and participation in activities for professional growth	The teacher demonstrates moderate ethical standards and levels of professionalism, with rudimentary recordkeeping systems and skills in reflection, modest communication with families or colleagues, and compliance with expectations regarding participation in school and LEA projects and activities for professional growth.	The teacher demonstrates high ethical standards and a genuine sense of professionalism by engaging in accurate reflection on instruction, maintaining accurate records, communicating frequently with families, actively participating in school and LEA events, and engaging in activities for professional development.	The teacher's ethical standards and sense of professionalism are highly developed, showing perceptive use of reflection, effective systems for recordkeeping and communication with families, leadership roles in both school and LEA projects, and extensive professional development activities. Where appropriate, students contribute to the systems for recordkeeping and family communication.
